Welcome

CORS Annual Conference 2019
Public health and innovation –
is regulation a friend or a foe?

Annual Conference of the
Copenhagen Centre for Regulatory Science

November 18, 2019
University of Copenhagen
Nielsine Nielsen Auditorium, Mærsk Tower
#CORSCconference2019

Broadcasting live from
http://tiny.cc/CORS2019
The duality of pharmaceutical regulation

- Protect and promote public health
- Foster innovation

The regulatory system for medicines is intended to protect public health, by ensuring that only medicines of sufficient quality, safety, and efficacy enter the market. At the same time, the system promotes public health, by facilitating patient access to needed therapies without unnecessary delay.

Mossialos et al 2010
CORS Mission
Through research and education in Regulatory Science, CORS will improve the drug regulatory system and thereby contribute to an improvement of the health of the society and sustainable drug innovation.

Ambitions

*Debate* and *disseminate* to increase societal relevance by

- integrating multi-disciplinary expertise
- incorporating multi-stakeholder perspectives
Goals of today

• Critical reflections of the functioning of the drug regulatory system

• Take into account different perspectives

• Ways forward
  -> ‘evidence-based process improvements’
Program of today

• Session 1 – Perspectives

• Session 2 – Experiences

• Session 3 – Ways forward
Thank you!

Conference Committee 2019:
• Christine Hallgreen
• Ole Bjerrum
• Steffen Thistrup
• Helle Christiansen
• Selene Bornati

Hope to see you next year
